

Dear Doctor,

I can not overly emphasize the importance of working with a quality Geneva Certified Laboratory. If you receive cases back from your dental laboratory and the case does not function in the mouth, it causes unnecessary post insertion adjustments which also leads to lost time, lost profits, lost esteem from your patient, lost opportunity for referrals and a loss of self-confidence in your own ability. You must be confident in your laboratory's ability to be successful with premium prosthetics.

Mr. Danilov's ability to deliver the finest laboratory work available has positioned his lab to be a synergistic force in the dental industry. Danilov Dental services many dentists who rely on quality work to become more profitable. Danilov Dentals commitment to provide work of the highest standard gives me the confidence to bestow the highest endorsement upon him.

If you have any questions or comments about his laboratory or services, please don't hesitate to call myself or one of Danilov Dentals trained staff at 1(800) 959-7033. Geneva Dental, Inc. and Danilov Dental Laboratory look forward to providing for your entire premium prosthetic needs.

Sincerely,

Roy A. Smudde, D.D.S.

President of Geneva Dental, Inc.
